HOMEOPATHY TREATMENT & HOMEOPATHIC REMEDIES

Homeopathy treats the person as a whole. It means that homeopathic treatment focuses on the patient as a person, as well as his pathological condition. The homeopathic medicines are selected after a full individualizing examination and case-analysis, which includes the medical history of the patient, physical and mental constitution etc. A miasmatic tendency (predisposition/susceptibility) is also often taken into account for the treatment of chronic conditions. The medicines given below indicate the therapeutic affinity but this is not a complete and definite guide to the treatment of this condition. None of these medicines should be taken without professional advice.

**Homeopathy Therapeutics**

Curare

**Prevention of Chloasma, Melasma.**

- Avoiding the sun and using sunscreen are key to preventing melasma.
- Avoid irritating the facial skin- No strong soaps or abrasive cleaners - use only a mild soap or cleanser for washing.
- Increase intake of foods high in folic acid, dark green leafy vegetables, wheat germ, asparagus, broccoli, potatoes, whole grains, fruits and vegetables.
